

**If a driver or front-seat
passenger is not buckled up**

**you can be ticketed
and pay up to**

\$65

in fines, costs and fees.

**BUCKLE
UP!**

Proper Safety Belt Usage

- Make sure all drivers and passengers buckle up **every** trip. Safety belts increase your chance of surviving a crash by 50 percent.
- Proper use for a person at least 4'9" and 80 pounds:
 - Shoulder belt snugly over shoulder.
 - Lap belt low on hips.
- Proper use for a youngster under 4'9" and 80 pounds:
 - Ride in a properly secured car seat or booster seat appropriate to age.
 - Michigan law requires children under age 4 to be in a properly installed car seat, and children ages 4–15 must be buckled up at all times.
 - Safety experts recommend that infants younger than age 1 ride in a rear-facing car seat in the **back** seat.
- Improper safety belt use can lead to death or serious injury in a crash.
